Abstract (Basic): KR 9503826 B

The method for setting the sales price easily with the push button includes initialising the I/O of a CPU by applying the constant voltage. The sales management data is displayed or the corresponding small change is dispensed if the D of the inventory switch is on, and system transfers to the setting mode of the sales price and displays the preset prices according to each inventory switch stage to set the new price.

If the D+ off of the inventory switch is on. The D+ is turned off of the inventory switch off and returned to next step after setting and storing new prices.
